### DESCRIPTION

The TA1800B is a fast pulse preamplifier with a small signal bandwidth of 1.8GHz.

A unique feature for such high speed amplifiers is the DC coupling. DC coupling avoids count rate effects due to non DC balanced pulse trains and the corresponding coupling capacitor charging.

A test with a 30mV<sub>P-P</sub> pulse and a P7889 100ps TOF analyzer showed an improvement of 10...15% in peak width (FWHM) when a TA1800B was used for amplification of the small pulse signal.
